

# ARC FLASH FACE SHIELDS

Arc flash face shields provide protection that is critically important in keeping workers safe. There are many methods of protecting personnel from arc flash hazards. This can include personnel wearing arc flash personal protective equipment (PPE) such as arc flash face shields. The best way to remove the hazards of an arc flash is to de-energize electrical equipment when interacting with it, however de-energizing electrical equipment is in and of itself an arc flash hazard. EFO Also supplies a full range of Arc Flash Clothing. Please contact the expert team at EFO for any assistance in selection of Arc Flash protective clothing and Electrical PPE.

## ARCSAFE AMPSHIELD ARC FLASH FACE SHIELD 14 CAL/CM2

**SKU:** FSAMP14ECKIT1

The ArcSafe® AmpShield Arc Flash Face Shield offers a transparent alternative to the traditional green face shields. The highly transparent, nearly clear, arc flash protective shield provides enhanced visibility and heightened colour recognition.
