

THE NEW  
**HALO™ SL**

## Increased Worker Visibility With Halo

The Halo is a new Personal Active Safety System that securely attaches to any hard hat and produces a ring of light around the wearer enabling them to **see and be seen** in all 360° directions at all times. Employees feel safer wearing the Halo light, they see the work area better and have increased peripheral vision in the dark. The Halo mitigates night-time road or vehicle movement safety concerns.
